

ABSTRACT

A fixing device is described. The device fixes a fan and a protocol-control-information long card having a tailpiece without using screws or tools.

- 5 The fan is for radiating heat from a hard disk and the protocol-control-information long card. The device comprises a plastic fan guard and a plastic fixture. The plastic fan guard is for fixing the fan in place, while the plastic fixture clamps the tailpiece of the protocol-control-information long card.
